PROFESSIONAL SUMMARY

Self-taught and results-driven **Full Stack Developer** with expertise in **MERN stack**, TypeScript, and scalable cloud deployments on AWS. Proven ability to deliver high-performance, production-ready applications, including optimizing legacy systems for 200% faster API responses and architecting scalable solutions from scratch. Adept at collaborating with cross-functional teams, resolving complex technical challenges, and consistently meeting tight deadlines. Passionate about clean code, modern development practices, and continuous learning.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, CSS, HTML, C++, Java

Frontend: React.js, Next.js, Redux, Tailwind CSS, Material UI, Bootstrap, React Router, React Hook Form, Formik

Backend: Node.js, Express.js, Nest.js, Socket.IO, JWT, bcrypt.js, Nodemailer, Mongoose

Databases: MongoDB, PostgreSQL, MySQL, Redis

Cloud & DevOps: AWS (EC2, S3, Route 53), Docker, Kubernetes, NGINX, PM2, Firebase, Google Cloud Platform

Tools & Platforms: Git, GitHub, Bitbucket, Jira, Trello, Slack, Postman, Figma, Cloudinary

Payment Integration: Stripe, Razorpay, Google Play, Apple Pay

Video & Communication: ZegoCloud, WebRTC

Architecture & Concepts: Clean Architecture, MVC, SOLID Principles, RESTful APIs, SDLC, OOP

PROFESSIONAL EXPERIENCE

Full Stack Developer

Zoptal Solutions Pvt. Ltd

Feb 2025 – Oct 2025

Punjab, India

- Served as **Backend Lead** for a SaaS Car Washing Platform, orchestrating end-to-end development of a MERN-stack application and directing integration of complex features including real-time booking and subscription management
- Architected and implemented a multi-faceted **booking engine** featuring real-time slot availability, service selection, and dynamic scheduling logic for scalable appointment management
- Integrated **Stripe API** to build robust subscription management system, enabling automated recurring billing, secure payment processing, and user plan management across multiple service tiers
- Developed comprehensive admin panel with **data-driven dashboard**, visualizing key business metrics including revenue trends, user growth, and booking patterns through interactive graphs and analytics
- Implemented scheduled **cron jobs** to automate user communications, including booking reminders, payment confirmations, and subscription status updates, improving customer engagement
- Enhanced user experience by implementing site-wide **dark mode** across admin interface and integrating third-party driver-side APIs with **Redis caching** to reduce latency and minimize external API calls
- Optimized a High-Traffic Event Booking Engine, achieving **200% API performance improvement** by restructuring database schema, implementing delayed slot creation, adding strategic indexes, and optimizing MongoDB queries for datasets exceeding 50K events
- Built core features for a **Social Media Platform** including content posting, user following system, and interaction feeds; designed responsive admin panel using React, Vite, and Bootstrap
- Implemented Service Booking & Payment System with Stripe payment gateway supporting saved cards, refunds, and subscription features; developed **Google Play and Apple Pay** in-app purchase integrations
- Deployed multiple production applications to **AWS EC2** using PM2 with multi-process clustering and NGINX reverse proxy for load balancing and SSL certificate management
- Collaborated closely with mobile front-end teams, delivering scalable backend APIs, admin panels, and technical solutions while consistently meeting tight project deadlines

MERN Stack Developer

Brototype

Jul 2023 – Feb 2025

Kerala, India

- Mastered the **MERN stack** (MongoDB, Express, React, Node.js) through independent research and

documentation-based learning, transitioning from zero knowledge to building production-ready applications within an intensive environment.

- Developed two full-stack projects from scratch implementing complex features including **real-time communication**, **third-party API integrations**, and **secure payment gateways**, while applying Clean Architecture and MVC design patterns
- Implemented **DevOps practices** including Dockerization, AWS hosting, and reverse proxy configuration for production deployment, with focus on scalability improvements and performance optimization under strict deadlines
- Engaged in weekly code reviews with **industry experts (4+ years experience)**, elevating code to production-level standards through focus on Clean Code practices, RESTful API design, and Git-based version control
- Directed a communication team of **20+ members**, organizing and facilitating weekly meetings and workshops to enhance professional communication and presentation skills within the cohort

FEATURED PROJECTS

AskExpert | *React, Node.js, MongoDB, Socket.IO, AWS*

[Live Link](#) | [GitHub](#)

- Built an online platform connecting users with verified professionals for remote consultations via chat and video, featuring appointment booking and distinct modules for Users, Experts, and Admins
- Implemented **real-time communication** via Socket.IO for chat and ZegoCloud for video calls
- Utilized **AWS S3** for secure and scalable user file storage; secured user access with Google Auth and Firebase OTP verification
- Built responsive UI with Tailwind CSS to optimize load times; integrated Stripe and Webhooks for secure international payment processing
- Engineered with **Clean Architecture and SOLID principles** for maintainable and scalable backend; improved performance by leveraging RTK Query for API response caching

VatchShop | *Node.js, Express.js, MongoDB, EJS, Bootstrap*

[Live Link](#) | [GitHub](#)

- Developed a scalable, fully responsive E-Commerce watch platform featuring complete admin and user experience including product management, cart, wishlist, order tracking, coupons, and multiple payment options
- Implemented user authentication with SMTP email verification and Google Auth; designed responsive UI/UX using EJS, Bootstrap, and CSS for seamless cross-device experience
- Integrated Razorpay API for secure payment gateway processing; developed full-featured Admin dashboard for user management, sales reporting, and product lifecycle control
- Deployed on **AWS EC2** with Nginx, Certbot, and PM2, achieving **99.9% uptime** and improved server response times

EDUCATION

Bachelor of Computer Applications

University of Calicut

2020 – 2023

Kerala, India

Higher Secondary (Computer Science)

GHSS Nirmamaruthur

2018 – 2020

Kerala, India

CERTIFICATIONS

Kubernetes Training for Beginner

Simplilearn via Coursera

AWS Certified Cloud Practitioner Cert Prep: Cloud Concepts

LinkedIn Learning

Career Essentials in Generative AI

Microsoft & LinkedIn
